

Technical brochure

Industrial Refrigeration Stop Valves SVA, SVA-ST, SVA-HS & SVA-SS

SVA are angleway and straightway stop valves which are designed to meet all industrial refrigeration application requirements.

The valves are designed to give favourable flow characteristics and are easy to dismantle and repair when necessary. The valve cone is designed to ensure perfect closing.

Features

- Applicable to all common refrigerants including R717 and non corrosive gases/ liquids dependent on sealing material compatibility
For CO₂ applications the SVA-S and SVA-L stop valves have to be used (SVA-S and SVA-L valves have a max. working pressure of 50/52 bar). For further information please see the technical brochure DKRCI.PD.KD1.A.
 - Optional accessories:
 - Heavy duty industrial hand wheel for frequent operation
 - Cap for infrequent operation
 - Lock washers for the stop valves subjected to high vibrations/pulsations
 - Available in angleway and straightway versions with standard bonnet or extended bonnet (15-100) for insulated systems
 - Each valve type is clearly marked with type, size and performance range
 - The valves and caps are prepared for sealing, to prevent operation by unauthorized persons, using a seal wire
 - Internal metal backseating
 - DN 6 - 65 (1/4 - 2½ in.)
 - Internal PTFE backseating
 - DN 80 - 200 (3 - 8 in.)
 - Can accept flow in both directions
 - Standard bonnet is suitable for installation in normal insulated systems
 - Housing and bonnet material for SVA-ST and HS is low temperature steel according to requirements of the Pressure Equipment Directive and other international classification authorities
- SVA-SS housing material is special cold resistant stainless steel approved for low temperature operations.
- Stainless steel bolts.
 - Maximum allowable working pressure and temperature range

SVA-ST	40 bar (580 psi) at -50°C/+150°C (-58°F/+302°F)
SVA-HS	40 bar (580 psi) at -60°C/+150°C (-76°F/+302°F)
SVA-SS (DN 15-65)	52 bar (754 psi) at -60°C/+50°C (-76°F/+122°F)
SVA-SS (DN 80-125)	50 bar (725 psi) at -60°C/+50°C (-76°F/+122°F)

For SVA-SS see the relation between PS and temperature for PS > 40 bar in the curve on page 3.

- Classification: DNV, CRN, BV etc.
To get an updated list of certification on the products please contact your local Danfoss Sales Company

Technical data

- Refrigerants (SVA 6-10 and SVA-ST)
Applicable to all common non flammable refrigerants including R717 and non corrosive gases/liquids dependent on sealing material compatability. For further information please see installation instruction for SVA.
For CO₂ applications the SVA-S and SVA-L stop valves have to be used. For further information please see the technical brochure DKRCI.PD.KD1.A.
- Refrigerants (SVA-HS)
Applicable to all common refrigerants including flammable hydrocarbons and all non-corrosive gases/liquids. For further information please see installation instruction for SVA-HS.
- Temperature range
Standard version (ST):
-50/+150°C (-58/+302°F).
High spec. and stainless steel version (HS and SS):
-60/+150°C (-76/+302°F).
- Pressure range
The valves are designed for max. working pressure 40 bar g (580 psi g). Valves for higher working pressure are available on request. SVA-SS are designed for max. working pressure 52 bar (754 psi g).
